EDUCATION

KESHAV MEMORIAL INSTITUTE OF TECHNOLOGY

Bachelor of Technology in
Information Technology - 2022 – 2026

KESHAV SMARAK JUNIOR COLLEGE

Intermediate - 2020 – 2022

ACADEMIC HEIGHTS PUBLIC SCHOOL

Secondary School - 2020

SKILLS

- Programming:** Python, Java, Node.js
- Web Technologies:** HTML, React.js, JavaScript
- Machine Learning:** Scikit-learn, NumPy, TensorFlow (basics), Pandas
- Databases:** SQL, MongoDB, NoSQL
- Version Control:** Git, GitHub
- Data Structures and Algorithms, Strong Problem-Solving & Analytical**
- Professional Skills:** Leadership, Project Management, Communication, Strategic Thinking, Team Collaboration.

HOBBIES

- Exploring Space & Technology
- Learning Emerging Technologies
- Playing Cricket
- Following Sports
- Listening to Music

PROFILE

Information Technology undergraduate with hands-on experience in full-stack development, machine learning, and software engineering projects. Skilled in building web applications, developing data-driven solutions, and applying problem-solving abilities to real-world challenges.

PROJECTS

Age & Gender Prediction

Oct 2023 – Feb 2024

- Developed a deep learning-based computer vision system to predict age groups and gender from facial images and webcam streams.
- Integrated pre-trained CNN models with OpenCV for real-time face detection and classification under varying conditions.
- Improved prediction reliability through image preprocessing and facial feature extraction techniques.

Job Navigator (Team Lead)

Sept 2024 – July 2025

- Developed a full-stack career guidance platform that recommends jobs and learning resources based on users' skills and interests.
- Implemented secure authentication, personalized recommendations, and career development features to streamline the job search process.
- Integrated MongoDB and REST APIs for secure user management and personalized recommendations.

DeciMind AI (Team Lead)

July 2025 – May 2026

- Developed a machine learning-based decision intelligence platform that generates personalized recommendations using structured user data.
- Designed and integrated recommendation algorithms, RESTful APIs, and a responsive user interface to enhance decision-making and user experience.
- Implemented machine learning algorithms for personalized recommendation generation.

VIRTUAL EXPERIENCE PROGRAMS

JPMorgan Chase & Co.

Jun 2026

Software Engineering Job Simulation
Built backend microservice components using Spring Boot, Kafka, REST APIs, and SQL databases.

Deloitte Australia

Jun 2026

Data Analytics Job Simulation
Performed data analysis and dashboard creation using Excel and Tableau.

Skyscanner

Jun 2026

Front-End Software Engineering Job Simulation
Developed and tested a React-based web application using Skyscanner's Backpack library.
