

TANMAY JAIN

Hyderabad, Telangana, India

9908657370 | tjain2745@gmail.com | linkedin.com/in/tanmayjain2745 | github.com/TanmayJain-27 | Portfolio

Professional Summary

Information Technology undergraduate with hands-on experience in full-stack web development, AI-based applications, and software engineering projects. Proficient in Java, Python, JavaScript, React.js, SQL, and Data Structures & Algorithms. Seeking a Graduate Software Engineer role to build scalable software solutions and grow as a developer.

Education

Keshav Memorial Institute of Technology (KMIT)

Bachelor of Technology in Information Technology

Expected August 2026

Hyderabad, Telangana

Keshav Smarak Junior College

MPC

June 2022

Hyderabad, Telangana

Academic Heights Public School

CBSE

March 2020

Hyderabad, Telangana

Technical Skills

Programming Languages: Java, Python, JavaScript, SQL, HTML

Frameworks & Libraries: React.js, Node.js, Express.js, REST APIs, CSS

Machine Learning: Scikit-learn, Pandas, NumPy, OpenCV

Databases: MongoDB, MySQL

Tools & Technologies: Git, GitHub, Postman, VS Code, Excel

Core CS: DSA, OOP

Projects

DeciMind AI : An AI-Powered Decision Intelligence System — Python, Scikit-learn, React.js **2025 - 2026**

- Developed an AI-powered decision support system that generates personalized recommendations from user data.
- Implemented content-based and collaborative filtering models using Scikit-learn to improve recommendation quality.
- Built data processing pipelines for analysis, prediction, and recommendation generation.
- Integrated machine learning models with a React-based frontend to deliver real-time recommendations through an interactive dashboard.

Job Navigator — React.js, Node.js, MongoDB **2024 - 2025**

- Developed a full-stack job portal enabling users to search, apply, and track job opportunities.
- Built secure REST APIs using Node.js and Express.js for authentication, job postings, and application management.
- Designed responsive user interfaces using React.js and integrated MongoDB for efficient data management.
- Implemented role-based access control for job seekers and recruiters with secure session handling.

Age & Gender Prediction — Python, OpenCV, Deep Learning **2023 - 2024**

- Developed a real-time age and gender prediction system using deep learning models trained on the Adience dataset.
- Implemented face detection and demographic classification using OpenCV and pre-trained CNN architectures.
- Designed the age prediction module as a multi-class classification problem, categorizing faces into predefined age ranges: (0–2), (4–6), (8–12), (15–20), (25–32), (38–43), (48–53), and (60–100).
- Enhanced prediction accuracy through image preprocessing, feature extraction, and model optimization techniques.

Certifications

- JPMorgan Chase & Co. Software Engineering Job Simulation
- Deloitte Data Analytics Job Simulation
- Skyscanner Front-End Software Engineering Job Simulation
